Street City State Zip

We acknowledge that a new swimming pool, spa or hot tub will be constructed or installed at the above reference property and hereby affirm that one of the following methods will be used to meet the minimum requirements of Chapter 515, Florida Statutes.

- The pool must be isolated from access to a home by an enclosure that meets the pool barrier requirements of s. 515.29 / FBC R4501.17;
□ The pool must be equipped with an approved safety pool cover complying with ASTM F 1346;
□ All doors and windows providing direct access from the home to the pool must be equipped with an exit alarm complying with UL2017 that has a minimum sound pressure rating of 85 dB A at 10 feet;
□ All doors providing direct access from the home to the pool must be equipped with a self-closing, self-latching device with a release mechanism placed no lower than 54 inches above the floor.
□ A swimming pool alarm that, when placed in a pool, sounds an alarm upon detection of an accidental or unauthorized entrance into the water. Such pool alarm must meet and be independently certified to ASTM Standard F2208, titled "Standard Safety Specification for Residential Pool Alarms," which includes surface motion, pressure, sonar, laser, and infrared alarms. For purposes of this paragraph, the term "swimming pool alarm" does not include any swimming protection alarm device designed for individual use, such as an alarm attached to a child that sounds when the child exceeds a certain distance or becomes submerged in water.
□ The pool height is a minimum of 48" above finished grade and the grade surrounding pool shall be level for a distance of 6 ft from the edge of the pool; and a removable/lockable ladder shall be used.

I understand that not having at least one of the above installed will constitute a violation of Chapter 515, F.S. and will be considered as committing a misdemeanor of the second degree, punishable by s775.082 or s775.083
